SILCA Transponder Chip T128C

Description

This SILCA T128C programming transponder is specifically for cloning Toyota 128 bit vehicles using a 'H' type key. You can clone this transponder in the same, familiar way you clone other transponders, using stand alone mode of the Silca RW4 Plus and Fast Copy Plus. The transponder can also be pre-set for programming Toyota and Subaru vehicles with a diagnostic device directly from the RW4 Plus keyboard.

Contains A Transponder Chip
