

HPC CO80 Switch Stick Car Opener

Description

The HPC Co80 Switch Stick is a five foot (1.5m) long bendable tool with a unique hook end designed to open cars from the inside. This tool slips into a vehicle between the window and door frame. Once inside, the Switch Stick acts as a third hand allowing you to flip switches, lift buttons, and hook handles. The hook has a protective coating and rubber cap, so the vehicle owner won't have to worry about a damaged interior. The Switch Stick is ideal for vehicles with side impact airbags where customers may be hesitant to have tools enter the door cavity.

Features

- Designed for through-car openings, this tool is 1.5m long and acts as a third hand inside the car
