

## SILCA New Style Dongle

### Description

---

The SILCA New Style Dongle is a secure and compact USB hardware key used to enable or authenticate software functions within SILCA's key programming or cloning systems. Designed for compatibility with the latest SILCA platforms, this updated dongle features a modernised form factor and improved durability, making it an essential tool for automotive locksmiths and key programming professionals. This dongle is required for software access and licence validation, ensuring only authorised users operate SILCA systems.

### Features

---

- Enables secure software access and machine operation
- Compact and lightweight, easy to carry and store
- Plug-and-play installation with USB connectivity
